A true motion powerhouse. Cutting edge automation solutions and software in the ctrlX platform. PLCs, HMIs, IO, motion control, actuators, linear motion, and conveyance.

Industrial and servo gearboxes, right angle worm, harmonic drives, and cycloidal gearing.

Low-backlash planetary gearboxes, rotary servo actuators, and servo motors and drives.

Seven axis cobot arms for precision, reach, and accuracy.

Pneumatic control engineering powerhouse, offering actuators, valves, airline equipment, fittings, chillers, sensors, and more.

Reliable, efficient, and flexible grippers, actuators, and rail brakes.

The world's best integrated servo and stepper motors.

Reliable and precise couplings, line shafts, and mount kits.

Electric linear actuators and ideal jack systems.

Innovative and exact rack driven linear actuators.

Unique, precision, multi-carriage motion control systems at any travel length. Linear actuators, rotary actuators, multi-axis gantrys, and rod-style actuators.

Cutting-edge motion controllers and servo drives.

Cost effective VFDs, power supplies, PLCs, HMIs, process controllers, servo drives and motors, sensors, and communication devices.

Micro-precise miniature linear guides, check valves, and positioning systems for high-tech mechanical engineering.

Robust and dependable cable management and entry systems.

Northwest Motion is dedicated to providing tailored, hands-on, premium solutions to every customer, every time.

WireCrafters

Wire partition products, safety cages, and guarding systems.

Precision gearboxes, servo couplings, rack and pinion, and linear mount kits.

EXOR

Comprehensive HMIs and IIoT edge devices and services.

HEIDENHAIN

Encoders, readouts and CNC controls for demanding positioning tasks.

EUCHNER

More than safety

Safe access controls, gate boxes, coded switches, and light curtains.

OMRON

Comprehensive safety solutions from components to devices. Light curtains, area scanners, and programmable relays.

Sensors and positioning systems for industry and mechanical engineering.

Kübler

First-class encoders, readouts, and slip rings.

EXLAR

Electric actuators in linear and rotary configurations.

Smart cable management systems and components.

SVT

A simple camera-agnostic software solution for machine vision.

Precise and compact linear and rotary actuators.

SENSOPART

Industrial vision and sensors for factory automation.

Beijer ELECTRONICS

Efficient and sustainable HMIs, PLCs, and IO and IIoT edge devices.

DEMAG

Integral braking gearmotors, wheelblocks, and high performance cranes.

Vacuum technology for automation, robotics, and clamping.

Comprehensive line of quality AC induction motors.
